The Malayalam Tutor

EZHUTHACHAN is a self-instructional English software package meant for assisting foreigners and students to learn Malayalam easily. It is basically a multimedia package with animations, which show the method of writing the letters and sound giving the pronunciation of characters and words. A writing pad is also provided, where a shaded model of each character appears and the user can practice writing over this using the mouse.

POTENTIAL BENEFICIARIES

Tourists and second-generation Malayalees living abroad can use this package to learn Malayalam. As the use of computers in schools increases, this package can be used to teach Malayalam in primary classes.

MODE OF TECHNOLOGY TRANSFER

Setup Wizard and Instruction manual in CD media.

EXPANDABILITY

Higher level lessons/Grammar lessons can be added to the package.
